

Checklist

Publishing a Datameer App

<input type="checkbox"/>	Place all necessary App elements (import jobs, data stores, workbooks, infographics) into a single folder. It could be helpful to have subfolders for supporting resources.
<input type="checkbox"/>	Choose a name for the App. The App name comes from the folder name in Datameer. We suggest keeping it to 25 characters or fewer.
<input type="checkbox"/>	Choose tags for your App. A comma separated list e.g. sentiment, twitter, politics.
<input type="checkbox"/>	Write a description for your App. This is how you market your app, so be thoughtful of messaging. It is helpful to provide the purpose of the app, data sources or connectors, required accounts (twitter, facebook, zendesk, etc), and give users a reason to install your app.
<input type="checkbox"/>	Take screenshots , the preferred size is 1280x1024 and infographics are a good choice to showcase your work.
<input type="checkbox"/>	Create an icon for your App. Icons are square, 90x90 is the best size.
<input type="checkbox"/>	Provide App contact details , i.e. support email (required), website and information about the company, organization or individual
<input type="checkbox"/>	Write up documentation . It is necessary to document your app so users can understand how to best use your app and customize it for their needs.
<input type="checkbox"/>	Right-click on the folder, choose Application and Publish to App Market .
